[Fundamentals of Electronics](#)

Programming Languages: An Active Learning Approach introduces students to three programming paradigms: object-oriented/imperative languages using C++ and Ruby, functional languages using Standard ML, and logic programming using Prolog. This interactive textbook is intended to be used in and outside of class. Each chapter follows a pattern of presenting a topic followed by a practice exercise or exercises that encourage students to try what they have just read. This textbook is best-suited for students with a 2-3 course introduction to imperative programming. Key Features: (1) Accessible structure guides the student through various programming languages. (2) Seamlessly integrated practice exercises. (3) Classroom-tested. (4) Online support materials. Advance praise: "The Programming Languages book market is overflowing with books, but none like this. In many ways, it is precisely the book I have been searching for to use in my own programming languages course. One of the main challenges I perpetually face is how to teach students to program in functional and logical languages, but also how to teach them about compilers. This book melds the two approaches very well." -- David Musicant, Carleton College

A tutorial and review exercises cover decimals, negative numbers, powers and roots, logarithms, the metric system, algebra, solving equations, trigonometry, and computer mathematics.

[180 Days of Problem Solving for Fifth Grade](#)

In this second edition, The book has corrected any mistakes, and tried to simplify the discussion about the various topics.

[Operations with Fractions: Adding and Subtracting Fractions Practice](#)

This introductory text covers basic electronics and the behavior of passive components, circuit analysis and systematic troubleshooting. The analytical methods used are strongly based on Ohm's and Kirchoff's Laws. Mathematics are used for analysis, but only after a solid, intuitive understanding of circuit or device operation has been established. With a heavy emphasis on critical thinking over rote memorization, and the coverage of state of the art technology, this text truly prepares students to use and apply the knowledge they acquire. Make math matter to students in grades 3–4 using Fact Mastery: Multiplication and Division! This 176-page book teaches students fundamental facts that prepare them for algebra. It includes more than 45 half-page activities; specific chapters on facts for products and quotients up to 25, 49, and 81; 58 timed tests for reinforcing the facts; 15 skill-building partner games; and 16 pretest and posttest assessment tools. The book supports NCTM standards.

[Algebra II Practice Book, Grades 7 - 8](#)

Staff Selection Commission - Combined Graduate Level Examination, often referred to as SSC is an examination conducted to recruit staff to various posts in ministries, departments and organisations of the Government of India. The Tier I exam consists of a written objective multiple-choice exam with four sections, covering the subjects of General Intelligence and Reasoning, General Awareness, Quantitative Aptitude, English Comprehension. The exam was typically scored with a maximum of 50 Marks per section for a total of 200 Marks Most positions required the candidate to take only the first two sections (Paper-I: Quantitative Aptitude, Paper-II: English Language and Comprehension), but certain positions require the third or fourth section. Tier III exam: Descriptive Paper A pen-and-paper "offline" exam in which candidates are to do writing in the form of essay writing and letter writing, and sometimes précis and application writing. The exam can be done in English or Hindi any language can be chosen as per the candidate's choice. Tier IV exam: Data Entry Skill Test / Computer Proficiency Test Data Entry Speed Test (DEST): candidates enter data at the rate of 2000 key presses in 15 minutes. This is mainly for positions such as Tax Assistant. (Central Excise & Income Tax) Computer Proficiency Test (CPT): covering the topics of word processing, spreadsheets, and making slides.

Learn to calculate dosages accurately and administer drugs safely! Gray Morris's Calculate with Confidence, Second Canadian Edition uses a clear, step-by-step approach to make drug dosage calculations easy. More than 2,000 practice questions help you review basic math and then master the three standard methods of dosage calculation: ratio and proportion, formula, and dimensional analysis. With the increasing responsibility of the nurse in mind, emphasis is placed on critical thinking and clinical reasoning in preventing medication errors. Reflecting current practice in Canadian health care, this book also provides excellent preparation for Canadian licensure exams! SI measurement units and generic/Canadian drug names are included throughout the text. Practice problems and real-world examples help students master correct dosage calculations and safe medication administration, with rationales included in practice problem answers to enhance the understanding of principles. Tips for Clinical Practice boxes summarize information critical to math calculation and patient safety. Safety Alert! boxes highlight common medication errors and identify actions that must be taken to avoid calculation errors. Chapter Review problems test student knowledge of all major topics presented in the

chapter. Pre-Test review includes practice problems to help students assess their basic math skills and identify their strengths and weaknesses, covering fractions, decimals, percentages, and ratio and proportion. Post-Test in Unit One allows students to assess and evaluate their understanding after completing the chapters on basic math. Comprehensive Post-Test at the end of the book covers dosage calculations and conversions, using real-life drug labels and situations. NCLEX® exam-style questions on Evolve help students prepare for the type of questions seen on the NCLEX-RN® Examination. NEW! Next Generation NCLEX-RN® exam-style case studies on the Evolve website provide drug calculation practice for the Next Generation NCLEX Examination. NEW! Increased number of Clinical Reasoning exercises builds students' critical thinking skills, with a focus on preventing medication errors. NEW! Thoroughly updated content includes the latest Health Canada-approved medications, current drug labels, the latest research, Canadian statistics, commonly used abbreviations, and recommended practices related to medication errors and their prevention. NEW! A-Z medication index references the page numbers where drug labels can be found. NEW! Tips for Clinical Practice from the text are now available on Evolve in printable, easy-reference format.
