The present book focuses on recent advances methods and applications in photovoltaic (PV) systems. The book is divided into two parts: the first part deals with some theoretical, simulation and experiments on solar cells, including efficiency improvement, new materials and behavior performances. While the second part of the book devoted mainly on the application of advanced methods in PV systems, including advanced control, FPGA implementation, output power forecasting based artificial intelligence technique (AI), high PV penetration, reconfigurable PV architectures and fault detection and diagnosis based AI. The authors of the book trying to show to readers more details about some theoretical methods and applications in solar cells and PV systems (eg. advanced algorithms for control, optimization, power forecasting, monitoring and fault diagnosis methods). The applications are mainly carried out in different laboratories and location around the world as projects (Algeria, KSA, Turkey, Morocco, Italy and France). The book will be addressed to scientists, academics, researchers and PhD students working in this topic. The book will help readers to understand some applications including control, forecasting, monitoring, fault diagnosis of photovoltaic plants, as well as in solar cells such as behavior performances and efficiency improvement. It could be also be used as a reference and help industry sectors interested by prototype development.

In the years since 9/11, counter-terrorism law and policy has proliferated across the world. This handbook comprehensively surveys how the law has been deployed in all aspects of counter-terrorism. It provides an authoritative and critical analysis of counter-terrorism laws in domestic jurisdictions, taking a comparative approach to a range of jurisdictions, especially the UK, the US, Australia, Canada, and Europe. The contributions to the book are written by experts in the field of terrorism law and policy, allowing for discussion of a wide range of regulatory responses and strategies of governance. The book is divided into four parts, reflective of established counter-terrorism strategic approaches, and covers key themes such as: Policing and special powers, including surveillance Criminal offences and court processes Prevention of radicalisation and manifestations of extremism Protective/preparative security The penology of terrorism In addressing counter-terrorism laws across a broad range of topics and jurisdictions, the handbook will be of great interest and use to researchers, students and practitioners in criminal law, counter-terrorism, and security studies.
