Ophthalmic Medical Assisting

A compilation of tidbits and factoids to assist in preparation for JCAHPO testing at COA, COT, and COMT levels. I've had at least a dozen people in the last couple months ask for copies of my self-compiled notes I used for studying for (and passing) the JCAHPO COA, COT, and COMT tests. Typically when someone asks, I gladly and dutifully run out to Kinko's, copy and print the files, and sometimes have them spiral bound for ease of use as well, and then am reimbursed for the cost. I've finally decided to streamline the process and get out of the middle of it, AND produce a nice looking product (and save gas money and time in front of the printer, lol!) The factoids are compiled from a multitude of resources through the years and started geared towards the COA. It was then added to and grown as I studied for the COT and COMT exams. I've found that different resources sometimes contradict one another, so occasionally you'll find some contradictions in the notes as well.

Product Description The Ophthalmic Scribe Manual is the ultimate how-to manual for learning to scribe in ophthalmology. If you're interested in learning more about scribing in retina, cornea, comprehensive, glaucoma, or oculoplastics, this manual has you covered. Inside, you will find over 100 full-color figures and tables illustrating the most important concepts, Anatomy & Physiology, organized high-yield abbreviations, must know medications, must know imaging modalities, and high-yield specialty-specific pathology. **About the Author** After graduating with a Bachelor of Science in Biology from the University of North Carolina at Chapel Hill and prior to enrolling in medical school, my job search brought me back home to Atlanta where I accepted a position as an Ophthalmic Medical Scribe. I had no prior experience as a scribe or in the healthcare field, but I knew that quickly improving my understanding of ophthalmology would be essential for my success. I searched the web to obtain every piece of relevant ophthalmology information that I could find, and I spent hours experimenting with the functionalities of the eye clinic's electronic medical record to better prepare myself for my new role. However, I found that it took a significant amount of time and effort to sift through the excessive online information before I was able to hone in on the relevant material. Due to the lack of designated ophthalmic medical scribe training resources and the vast amount of irrelevant information online, I decided that the creation of The Ophthalmic Scribe Manual was warranted. With over 3 years of scribing experience and over 20,000 patient encounters, as well as having published a variety of first author case reports and review articles in prominent ophthalmic medical journals, I am confident that my experiences will offer an immediate benefit to those seeking to excel in this
