Zonder dat hij het doel van zijn tocht kent, maakt een jongen die altijd in een kamp heeft geleefd een lange en moeilijke reis dwars door Europa. These Study Guides have been developed exclusively with the Caribbean Examinations Council (CXC) to be used as an additional resource by candidates who are following the Caribbean Secondary Education Certificate (CSEC) programme. They provide candidates with extra support to help them maximise their performance in their examinations. Study Guides for CSEC have been developed and written by CXC to provide CSEC candidates in schools and colleges with resource materials to help them prepare for their examinations. Matching the topics in the syllabus, the student-friendly structure and content enable students to develop their skills and confidence as they approach the examination. This completely new title is an up-to date resource that meets the requirements of the latest CXC syllabus examinable from 2011. Written by a pan-Caribbean, it has an emphasis on students applying biological principles, knowledge and skills for the maintenance of health and for solving the problems of living together. Biology for CXC is a comprehensive course for students in their fourth and fifth years of secondary school who are preparing for the CXC Examinations in Biology. The book has seven main sections, each divided into smaller self contained units to allow a flexible approach to teaching and learning. In this report, the government of Grenada details its efforts to comply with the Convention on the Elimination of All Forms of Discrimination against Women and thus improve the quality of life of Grenadian women and girls. It discusses the laws, policies, and programs through which the Convention is being implemented. It also provides information on many of the problems the country's women face. Includes 34 statistical tables. These Study Guides have been developed exclusively with the Caribbean Examinations Council (CXC) to be used as an additional resource by candidates who are following the Caribbean Secondary Education Certificate (CSEC) programme. They provide candidates with extra support to help them maximise their performance in their examinations. Ross en Wilson is de eerste keuze van reeds meer dan een miljoen studenten sinds de eerste publicatie meer dan 50 jaar geleden. Als een van de meest populaire handboeken voor anatomie en fysiologie introduceert het de systemen en functies van het menselijk lichaam en de effecten van ziektes en aandoeningen op het normaal functioneren van het lichaam. Meer dan eender welk handboek is Ross en Wilson gekenmerkt door het gebruik van heldere taal aangevuld met kleurrijke illustraties en een groot aanbod van interactieve online-activiteiten voor een boeiende leerervaring. Ross en Wilson is noodzakelijk studie en leesmateriaal voor ieder in de gezondheidszorg en vooral voor professionelen in opleiding in de verpleging en aanverwante beroepen, complementaire/alternatieve geneeskunde of voor paramedici en ambulancepersoneel. Zorvuldig herwerkte tekst zonder onnodige details om verwarring bij de student, nieuw aan dit leervak, te vermijden. Vele duidelijke illustraties in kleur met diagrammen en foto's. Reeks van paragrafen, punten- en bulletlijst helpen bij het leren en herhalen van de leerstof. Leerdoelen voor paragrafen in elk hoofdstuk. Lijst met veel gebruikte voorzetsels, achtervoegsels en woordstammen in anatomie en fysiologie. Appendix met biologische waarden als referentie. Toegang tot extra elektronische bronnen, inclusief animaties, inkleur oefeningen, studies, zelftestactiviteiten, en weblinks. Volledig herziende tekst met focus op de meest voorkomende aandoeningen. Nieuwe paragrafen over de invloed van het verouderen op de lichaamssystemen om de kernonderdelen van de leerstof te bestendigen en het weerspiegelt ook de veroudering van onze bevolking. Een nieuw en gemakkelijk te gebruiken functie is toegevoegd voor de uitgebreide en variërende selectie van populair web gebaseerde online zelfevaluatie taken. Extra gekleurde micrografieën en foto's. Evenals bijgewerkte illustraties. Aangevulde verklarende woordenlijst voor een vlug en gemakkelijk te gebruiken referentie naar veel gebruikte terminologie. The Environment and Science and Technology Education covers topics on key issues in environmental education; school-based primary and secondary education; and community-based environmental education. The book also discusses topics on tertiary, professional and vocational environmental education and non-formal public environmental education. The text will give practical help to teachers in all countries in order to raise standards of education in those topics essential for development. Based on the Office of Education's Annual survey of enrollment for advanced degrees. Intended for the students following the Human and Social Biology syllabus for CXC (CSEC). This illustrated work contains explanations on all topics and includes Caribbean examples. It is a useful resource for the students of this subject. This book presents an international perspective of the influence of educational context on science education. The focus is on the interactions between curriculum development and implementation, particularly in non-Western and non-English-speaking contexts (i.e., outside the UK, USA, Australia, NZ, etc.). No information available at this time. Author will provide once available. This book offers complete coverage of the CSEC Biology syllabus. Concise, well-organised text with annotated study diagrams. Emphasis on genetics, diseases and the environment. Specimen questions in the style of the examination. Guidance on planning revision and work presentation. The past few years have witnessed an explosive increase in our collective knowledge of the biology of the human immunodeficiency virus (HIV). Researchers have acquired new understanding of the virus's biochemistry, molecular biology, pathogenesis, genetics, and immunobiology. Resulting therapeutic advances have significantly prolonged the lives of thousands. Yet, the need to develop better therapies is ever more acute and--given the virus's continued spread through the human population--the need for an effective vaccine is urgent. These goals can be accomplished only through the experienced synthesis of information from the many disciplines participating in HIV research and through the insights of new investigators. This volume is designed to lower the barriers imposed on investigators by the sheer volume of available information--information that often can be found only in far-flung and specialized journals. It provides, in a single resource, an in-depth overview of the diverse areas that constitute HIV research. The result is a broad introduction for students and researchers new to the field as well as an integrated overview for researchers specialized in particular areas of HIV investigation. The volume will also benefit those seeking technical understanding of the virus's biology, including physicians treating HIV-infected patients. Each chapter is a comprehensive presentation of one area of current AIDS research--including work on the virus life cycle, epidemiology, genetics, protease and reverse transcriptase inhibitors, receptor and co-receptor interactions, therapeutic targets, clinical treatment, immunobiology, and vaccines--written by a leading researcher in that area. The contributors are Jon P. Anderson, Jan Balzarini, Elana Cherry, Thomas J. Coates, Chris Collins, Jon H. Condra, Mark B. Feinberg, Richard B. Gaynor, Matthias Götte, Daria J. Hazuda, Spyros Kalams, Nathaniel R. Landau, Gerald H. Learn, Norman L. Letvin, James I. Mullins, Will Scott E. Naugler, David Nickle, Matthew Rain, Allen G. Rodrigo, Daniel Shriner, Shalom Spira, Mario Stevenson, Todd Summers, Catherine Ulich, Joseph P. Vacca, Mark A. Wainberg, Bruce D. Walker, and Yang Wang. Education in the Commonwealth Caribbean and Netherlands Antilles provides a contemporary survey of education development and key educational issues in the region. The chapters cover: Anguilla, Antigua and Barbuda, the Bahamas, Barbados, Belize, Bermuda, the British Virgin Islands, the Cayman Islands, Dominica, Grenada, Guyana, Jamaica, the Netherlands Antilles (Aruba, Bonaire, Curacao, Saba, Saint Eustatius and Saint Maarten), Montserrat, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Surinam, Trinidad and Tobago, and the Turks and Caicos Islands. The book includes discussions of the impact of local, regional and global occurrences, including social, political and geographical events, on education systems and schooling in the region. As a whole, the book provides a comprehensive reference resource for contemporary education policies in the Caribbean, and explores some of the problems these countries face during the process of development. It is an essential reference for researchers, scholars, international agencies and policy-makers at all levels. Provides summary data by institutional control and type, sex of recipient, State, type of curriculum, and discipline division and specialty. No information available at this time. Author will provide once available. The CSEC Human and Social Biology Concise Revision Course provides full coverage of the CSEC HSB syllabus. This book provides comprehensive and authoritative guidance for the course. It adopts a practical, supportive approach to help students with their learning. Revision exam and assessment guidance questions consolidate this learning. \* Full coverage of the CSEC Human and Social Biology course \* Advice on organising your
