Edexcel Economics A Student Guide: Theme 2 The UK economy - performance and policies

Spurred by the success of the first stress test of US banks toward the end of the global economic crisis in 2009, stress testing of large financial institutions has become the cornerstone of banking supervision worldwide. The aim of the tests is to determine which banks are adequately capitalized under severe economic shocks and to order corrective measures for those that are vulnerable. In Banking’s Final Exam, one of the world’s leading experts on banking regulation concludes that the tests administered on both sides of the Atlantic suffer from fundamental weaknesses, leading to a false sense of reassurance about the safety and soundness of the banking system. Some weaknesses can be corrected within the existing

bank-capital regime, but others will require bold reforms—including higher minimum capital requirements for the largest and most systemically-important banks. The banking industry is likely to resist these reforms, but this book explains why their objections do not hold water.

This book takes a cross-disciplinary look at the financial markets of emerging markets in Latin America. The author wants to disassemble the black box that is the financial market: what are the motivations and interests of the various actors, both institutional and individual?; How do these interact with each other?; How does this information help us understand the Mexican crisis in the 90s and the current crisis in Argentina? The author has conducted extensive interviews with brokers, asset managers, economists, strategists, and analysts in the US, UK, Europe, and Latin America, providing significant material for this study.
