In *De vijf frustraties van teamwork* legt Patrick Lencioni de kern van samenwerking in teams bloot. Dat doet hij aan de hand van deze parabel, waarin Catherine Petersen als ceo een team moet leiden dat onderling zo in conflict is geraakt dat het de hele organisatie negatief beïnvloedt. Gaandeweg openbaren zich vijf grote frustraties waarmee teamleden worstelen, frustraties die de samenwerking saboteren: gebrek aan betrokkenheid, afschuiven van verantwoordelijkheid en niet-resultaatgericht werken. Lencioni laat middels dit verhaal zien hoe deze hindernissen ontstaan en hoe je ze achter je kunt laten. Vervolgens werkt hij het onderliggende model uit. Een boek met een krachtige boodschap voor iedereen die in of met teams werkt.

Stephen King, Over leven en schrijven `Een meesterverteller.' VPRO Gids `Hoe doet King dat toch?' vroeg Joost Zwagerman zich al af in de Volkskrant. Hoe slaagt King er toch telkens weer in zijn lezers aan zich te binden en ze te verrassen? Hierover gaat Over leven en schrijven. Stephen King verhaalt over zijn jeugd, zijn puberjaren en zijn studietijd. Over de jaren na zijn doorbraak als schrijver, met Carrie, waarin succes en stress hem achtervolgen en de drank een uitvlucht biedt. Over het ongeluk dat hem in 1999 bijna het leven kost. En hoe hij er weer bovenop komt door zijn onweerstaanbare drang tot schrijven. Over wat hem inspireert en hoe hij te werk gaat. En natuurlijk laat King zijn licht schijnen over het belangrijkste wapen van elke schrijver: de pen die de auteur altijd in de aanslag moet hebben. Over leven en schrijven is een bron van inspiratie, voor zowel lezers als (aspirant-)schrijvers. Stephen King (1947) heeft meer dan tweehonderd verhalen op zijn naam staan, waaronder vijftig thriller- en fantasy-titels, alle wereldwijde bestsellers, waaronder Under the Dome (Gevangen), 22-11-1963, De Donkere Toren-reeks, Joyland, De Shining en Dr. Sleep.

Advocaat, accountant, computerprogrammeur – dat moesten we van onze ouders worden. Maar ze hadden ongelijk, de toekomst is aan een heel ander soort individu, aan een andere manier van denken. De dominantie van de linkerhersen helft – van het verstand, de logica en het analytisch vermogen – maakt plaats voor een nieuwe wereld waarin de kwaliteiten van de rechterhersen helft – creativiteit, gevoel en intuïtie – overheersen. Dat betoogt Daniel H. Pink, die de twee hersenhelften gebruikt als metafoor voor de ontwikkelingen van onze tijd. In Een compleet nieuw brein vertelt Pink precies welke zes vaardigheden je moet ontwikkelen om in de toekomst succesvol te zijn. Aan de hand van praktische oefeningen, afkomstig van experts over de hele wereld, helpt hij je deze vaardigheden aan te scherpen. Dit boek zal je kijk op de wereld voorgoed veranderen.

Contrary to what students, and society, are conditioned to think, obtaining a college degree does not automatically result in a job, let alone a dream career. In the last year, alone, half of college graduates are either jobless or underemployed in positions that don't fully use their skills and knowledge. Authors Tori Randolph Terhune, a gainfully-employed young college graduate herself, and Betsy A. Hays, a college professor, show readers what they can do in college to successfully pave the way for future employment in *Land Your Dream Career*. The authors provide eleven easy-to-follow strategies for effectively using time on campus to start building a career. Terhune and Hays leads students through content designed to help students set themselves up for success, without focusing on grades or papers. The eleven steps include tips about how students can become experts in their fields, build their brand, get involved in and outside the classroom, allow for wiggle room, network, follow the 75/25 rule (75% thinking, 25% doing) and use new media, such as social networking and blogging, to launch their career. Any student looking for that connection from college to getting

Step by Step to College and Career Success

Cut through the noise and make better college and career choices This book is about addressing the college-choosing problem. The rankings, metrics, analytics, college visits, and advice that we use today to help us make these decisions are out of step with the progress individual students are trying to make. They don't give students and families the information and context they need to make such a high-stakes decision about whether and where to get an education. Choosing College strips away the noise to help you understand why you're going to school. What's driving you? What are you trying to accomplish? Once you know why, the book will help you make better choices. The research in this book illustrates that choosing a school is complicated. By constructing more than 200 mini-documentaries of how students chose different postsecondary educational experiences, the authors explore the motivations for how and why people make the decisions that they do at a much deeper, causal level. By the end, you'll know why you're going and what you're really chasing. The book: Identifies the five different Jobs for which students hire postsecondary education Allows you to see your true options for what's next Offers guidance for how to successfully choose your pathway Illuminates how colleges and entrepreneurs can build better experiences for each Job The authors help readers understand not what job students want out of college, but what "job" students are hiring college to do for them.
