Early Identification and Intervention of Suicide Risk in Chinese Young Adults The work of early childhood education and care (ECEC) professionals is the major driver of the quality of an ECEC system. As evidence accumulates on the strong benefits of investing in early education, countries need effective policies to attract, maintain and retain a highly skilled workforce in the sector.

Redefining the Psychological Contract in the Digital Era This book introduces the psychological contract as a multi-level contextual construct and closes some of the knowledge gaps on the nature of the digital era psychological contract. The digital

Read Free Pre Training Programme Express 2017 Expert Patients And

era psychological contract gives rise to a new type of employer-employee relationship manifesting at the nexus between people and technology in a post-COVID-19 world. The book volume provides promising new approaches for psychological contract research, offering a rich compendium of reflections on the shifts in employer-employee expectations and obligations, as well as suggestions for future research and practice. Chapter contributions are divided into four main sections: The Digital Era: Contextual Issues and the Psychological Contract Managing the Psychological Contract in the Digital Era: Issues for Organisational Practice Managing the Psychological Contract in the Digital Era: Issues of Diversity Integration and Conclusion Redefining the Psychological Contract in the Digital Era is an insightful examination of the evolving nature of the psychological contract, presenting novel insights into the antecedents, consequences, and facets of the new multi-level contextual digital era psychological contract. The primary audience for this book volume is advanced undergraduate and postgraduate students in industrial and organisational psychology and human resource management, as well as scholars in both academic and applied work settings. Human resource managers and professionals will also have an interest in this book volume.

Building Teacher Capacity in English Language Teaching in Vietnam Capturing the narratives of indigenes, this book presents a unique anthology on global Indigenous peoples' wisdoms and ways of knowing. Covering issues of religion, cultural self-determination, philosophy, spirituality, sacred sites, oppression, gender and the suppressed voices of women, the diverse global contexts across Africa, Asia, the Middle East, North and South America, and Oceania are highlighted. The contributions represent heart-felt expressions of Indigenous peoples from various contexts - their triumphs and struggles, their gains and losses, their reflections on the past,

Read Free Pre Training Programme Express 2017 Expert Patients And

present, and future - telling their accounts in their own voices. Opening new vistas for understanding historical ancient knowledge, preserved and practiced by Indigenous people for millennia, this innovative anthology illuminates areas of philosophy, science, medicine, health, architecture, and botany to reveal knowledge suppressed by Western academic studies.

Proceedings of IAC 2021 in Budapest Each year, Advances in Surgery reviews the most current practices in general surgery. A distinguished editorial board, headed by Dr. John Cameron, identifies key areas of major progress and controversy and invites preeminent specialists to contribute original articles devoted to these topics. These insightful overviews in general surgery bring concepts to a clinical level and explore their everyday impact on patient care.

Capturing Loyalty: How to Measure, Generate, and Profit from Highly Satisfied Customers The often-tenuous relationship between law enforcement and communities of color, namely African Americans, has grown increasingly strained, and the call for justice has once again ignited the demand for criminal justice reform. Rebuilding the trust between the police and the citizens that they have sworn to protect and serve requires that criminal justice practitioners and educators collaborate with elected officials and commit to an open, ongoing dialogue on the most challenging issues that remain unresolved but demand collective attention and support. Reform measures are not limited to policing policies and practices, but rather extend throughout the criminal justice system. There is no denying that the criminal justice system as we know it is flawed, but not beyond repair. Global Perspectives on Reforming the Criminal Justice System provides in-depth and current research about the criminal justice system around the world, its many inadequacies, and why

Read Free Pre Training Programme Express 2017 Expert Patients And

it urgently needs reformation. Offering a fully fleshed outline of the current system, this book details the newest research and is incredibly important to fully understand the flaws of the criminal justice system across the globe. The goals of this book are to improve and advance the criminal justice system by addressing the glaring weaknesses within the system and discuss potential reforms including decreasing the prison population (decarceration) and improving police/community relations. Highlighting topics that include accountability, community-oriented policing, ethics, and mass incarceration, this book is ideal for law enforcement officers, trainers/educators, government officials, policymakers, correctional officers, court officials, professionals, researchers, academicians, and students in the fields of criminal justice, criminology, sociology, psychology, addictions, mental health, social work, public policy, and public administration.

Indigenous Peoples' Wisdom and Power As the law and politics of migration become increasingly intertwined, this thought-provoking Research Handbook addresses the challenge of analysing their growing relationship. Discussing the evolving theoretical approaches to migration, it explores the growing attention given to the legal frameworks for migration and the expansion of regulation, as migration moves to the centre of the political global agenda. The Research Handbook demonstrates that the overlap between law and politics puts the rule of law at risk in matters of migration.

The Application of the Third Generation of Cognitive-Behavioral Approaches to Parenting This publication assesses progress towards Sustainable Development Goal 4 (SDG 4) on education and its ten targets, as well as other related education targets in the SDG agenda. It addresses inclusion in education, drawing attention to all

Read Free Pre Training Programme Express 2017 Expert Patients And

those excluded from education, because of background or ability. The report is motivated by the explicit reference to inclusion in the 2015 Incheon Declaration, and the call to ensure an inclusive and equitable quality education in the formulation of SDG 4, the global goal for education. It reminds us that, no matter what argument may be built to the contrary, we have a moral imperative to ensure every child has a right to an appropriate education of high quality.

Adaptation to Psychological Stress in Sport Biological engagement programs are a set of projects or activities between partner countries that strengthen global health security to achieve mutually beneficial outcomes. Engagement programs are an effective way to work collaboratively towards a common threat reduction goal, usually with a strong focus on strengthening health systems and making the world a safer place. Cooperative programs are built upon trust and sharing of information and resources to increase the capacity and capabilities of partner countries. Biological engagement programs reduce the threat of infectious disease with a focus on pathogens of security concern, such as those pathogens identified by the U.S. Government as Biological Select Agent and Toxins. These programs seek to develop technical or scientific relationships between countries to combat infectious diseases both in humans and animals. Through laboratory biorisk management, diagnostics, pathogen detection, biosurveillance and countermeasure development for infectious diseases, deep relationships are fostered between countries. Biological engagement programs are designed to address dual-use issues in pathogen research by promoting responsible science methodologies and cultures. Scientific collaboration is a core mechanism for engagement programs are designed to strengthen global health security, including prevention of avoidable epidemics; detection of threats as early as possible; and rapid and effective outbreak response. This Research Topic

Read Free Pre Training Programme Express 2017 Expert Patients And

discusses Biological Engagement Programs, highlighting the successes and challenges of these cooperative programs. Articles in this topic outlined established engagement programs as well as described what has been learned from historical cooperative engagement programs not focused on infectious diseases. Articles in this topic highlighted selected research, trainings, and programs in Biological Engagement Programs from around the world. This Topic eBook first delves into Policies and Lessons Learned; then describes Initiatives in Biosafety & Biosecurity; the core of this work documents Cooperative Research Results from the field; then lastly the Topic lays out potential Future Directions to the continued success of the World's cooperative science in reducing the threat of infectious diseases.

Global Education Monitoring Report 2020 One of a series of studies on vocational education and training, this review focuses on the apprenticeship system in England and concludes with policy recommendations.

OECD Reviews of Evaluation and Assessment in Education Romania 2017 We are delighted to introduce the proceedings of the first edition of the 2019 International Conference on Advances in Education, Humanities, and Language (ICEL). The aim of ICEL (International Conference on Advances in Humanities, Education and Language) is to provide a platform for researchers, professionals, academicians as well as industrial professionals from all over the world to present their research results and development activities in Education, humanities, and Language. The theme of ICEL 2019 was "Mainstreaming the Influences on Higher Order of Thinking Skills in Humanities, Education, and Language in Industrial Revolution 4.0". The technical program of ICEL 2019 consisted of 77 full papers, including invited papers in oral presentation sessions at the main conference tracks. Aside from the high quality

Read Free Pre Training Programme Express 2017 Expert Patients And

technical paper presentations, the technical program also featured six keynote speeches, Hamamah, Ph.D (Univeritas Brawijaya, Indonesia), Prof. Dr. Nuraihan binti Mat Daud (UIIM, Malaysia), Dr. Edith Dunn (Conservator/Cultural Specialist, USA), Prof. Yoshihiko -Sugimura (university of Mizaki, Japan), Prof. Park Yoonho (Sunchon National University, Korea) and Prof. Su Keh Bow (Soochow University, Taiwan). We strongly believe that ICEL conference provides a good forum for all researchers, developers and practitioners to discuss various advances that are relevant to education, humanities, and language. We also expect that the future ICEL conference will be as successful and stimulating, as indicated by the contributions presented in this volume

Biological Engagement Programs: Reducing Threats and Strengthening Global Health Security Through Scientific Collaboration The journey to uncover the inner anxiety issues relating to the development of an unhealthy personal identity was resolved through this research project. The pastoral care ministry began to flow more effectively when the anxiety from my personal identity was resolved. My journey of discovery can be seen throughout the following six chapters. This research project is aimed to provide clergy and laypersons a tool of training to use in reducing anxiety in practicing pastoral care. This research is a result of over thirty years of interpathic training, having discussions with experts in pastoral care, including detailed feedback and discussions with clergy, laypersons, and professionals.

ICEL 2019 Contemporary societies are constructed, constricted, and constrained by various series of examinations. Governments of both Western and non-Western countries tend to conduct detailed, multi-layered and continuous systems of tests or examinations. International tests, such as PISA and TIMSS, have also been introduced

Read Free Pre Training Programme Express 2017 Expert Patients And

to compare the relative performances of learners within diverse educational institutions across different countries. Examinations therefore provide a methodological pivot for comparing a range of societies. They enable us to contrast the West and the East; the North and the South; tribal and mass society; ancient and postmodern civilization; and so on. Comparing parallel societies from across Asia, the Middle East, Europe, and North America, this book proposes fundamental transitions in sociological research from system to process and from communication to composition through intensive studies on examinations. It uses ethnographies, interviews, questionnaires, documents, statistics, and big-data analyses to make comparisons on broad scales of time and space. In so doing, it suggests hypotheses encompassing different kinds of societies in human history, including those in the Axial Age and the Modern Ages.

Laboratory Studies for Brewing Students - A Systematic Course of Practical Work in the Scientific Principles Underlying the Processes of Malting and Brewing

Twelfth Five Year Plan, 2012-2017: Social sectors The transition from early childhood education to primary school is a big step for all children, and a step which more and more children are having to take. Quality transitions Should be well-prepared and child-centred, managed by trained staff collaborating with one another, and guided by

Romania's education system has made impressive strides over the past two decades, with an increasing share of students mastering the basic competencies that they need for life and work. But these average improvements mask significant disparities in learning outcomes and attainment, with an

Research Handbook on the Law and Politics of Migration

Descriptive Analysis in Sensory Evaluation This outstanding new handbook offers unique coverage of all aspects of neuropsychological rehabilitation. Compiled by the world's leading clinician-researchers, and written by an exceptional team of international contributors, the book is vast in scope, including chapters on the many and varied components of neuropsychological rehabilitation across the life span within one volume. Divided into sections, the first part looks at general issues in neuropsychological rehabilitation including theories and models, assessment and goal setting. The book goes on to examine the different populations referred for neuropsychological rehabilitation and then focuses on the rehabilitation of first cognitive and then psychosocial disorders. New and emerging approaches such as brain training and social robotics are also considered, alongside an extensive section on rehabilitation around the world, particularly in under-resourced settings. The final section offers some general conclusions and an evaluation of the key issues in this important field. This is a landmark publication for neuropsychological rehabilitation. It is the standalone reference text for the field as well as essential reading for all researchers, students and practitioners in clinical neuropsychology, clinical psychology, occupational therapy, and speech and language therapy. It will also be of great value to those in related professions such as neurologists, rehabilitation physicians, rehabilitation psychologists and medics.

Global Perspectives on Reforming the Criminal Justice System International Academic Conferences: Management, Economics and Marketing (IAC-MEM) Teaching, Learning and E-learning (IAC-TLEl) Transport, Logistics, Tourism and Sport Science (IAC-TLTS) Engineering, Robotics, IT and Nanotechnology (IAC-ERITN)

Mastering Anti-Corruption This book provides new ideas on how to work with and constructively transform shame on a theoretical and practical level, and in various socio-cultural contexts and professions. It provides practical guidelines on dealing with shame on the basis of reflection, counselling models, exercises, simulations, specific psychotherapeutic approaches, and auto-didactical learning material, so as to transform shame from a negatively experienced emotion into a mental health resource. The book challenges theorists to adopt an interdisciplinary stance and to think “outside the box.” Further, it provides practitioners, such as coaches, counsellors, therapists, trainers and medical personnel, with practical tools for transforming negative experiences and emotions. In brief, the book shows practitioners how to unlock the growth potential of individuals, teams, and organisations, allowing them to develop constructively and positively.

Apprenticeship in England, United Kingdom The experience of children under age 3 with early childhood education and care (ECEC) is crucial for their learning, development and well-being and for parents’ return to work. Despite increasing recognition of the importance of ECEC for the youngest children, little is known about this sector.

TALIS Quality Early Childhood Education and Care for Children Under Age 3 Results from the Starting Strong Survey 2018 This vintage book contains a systematic course

Read Free Pre Training Programme Express 2017 Expert Patients And

of practical work in the scientific principles underlying the processes of malting and brewing. "Laboratory Studies for Brewing Students" is highly recommended for those with an interest in the science and development of brewing processes, and would make for a fantastic addition to collections of allied literature. Contents include: "A Study of the Barley Corn", "The General Characteristics of a Grain of Barley", "Ear of Ripe Barley and Spike of Barley when in Flower Compared", "The Flower of Barley", "Ovary", "Anthers", "Lodicules", "The Flower after Fertilisation", "Barley and Wheat Compared", "Ears of Two-rowed and Six-rower Barley Compared", et cetera. Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an affordable, modern edition complete with a specially commissioned new introduction on beer brewing.

TALIS Building a High-Quality Early Childhood Education and Care Workforce Further Results from the Starting Strong Survey 2018 Building on past OECD work on early childhood education and care, and drawing on the experience of OECD countries, this report outlines good practice policy measures for improving jobs in ECEC and for constructing a high-quality workforce.

Starting Strong V Transitions from Early Childhood Education and Care to Primary Education One of a series of studies on vocational education and training, this review focuses on the apprenticeship system in England and concludes with policy recommendations. England has launched a series of reforms that champion the institution of apprenticeship, and address some previous weaknesses. The reforms encourage more substantive apprenticeship programmes and a stronger funding framework. Despite these strengths, there is still some way to go to establish an

Read Free Pre Training Programme Express 2017 Expert Patients And

apprenticeship system in England to match those of the strongest countries. This report suggests several ways in which reforms might be adapted to achieve higher quality and better outcomes. An effective apprenticeship system involves various elements such as the development of the apprentice in the workplace by the employer and the broader education of young apprentices. The report argues that England should consider introducing regulations and standards to ensure that these elements are part of all apprenticeship programmes, and that the recently introduced apprenticeship levy supports high-quality training. In comparison to other countries, England has relatively few young apprentices. The report suggests England could facilitate transition from school to work by making better use of apprenticeships targeting school leavers.

Agency in Language Policy and Planning: This book focuses on the human aspects of wearable technologies and game design, which are often neglected. It shows how user centered practices can optimize wearable experience, thus improving user acceptance, satisfaction and engagement towards novel wearable gadgets. It describes both research and best practices in the applications of human factors and ergonomics to sensors, wearable technologies and game design innovations, as well as results obtained upon integration of the wearability principles identified by various researchers for aesthetics, affordance, comfort, contextual-awareness, customization, ease of use, ergonomics, intuitiveness, obtrusiveness, information overload, privacy, reliability, responsiveness, satisfaction, subtlety, user friendliness and wearability. The book is based on the AHFE 2018 Conference on Human Factors and Wearable Technologies and the AHFE 2018 Conference on Human Factors in Game Design and Virtual Environments , held on July 21-25, 2018 in Orlando, Florida, and addresses professionals, researchers, and students dealing with the human

Read Free Pre Training Programme Express 2017 Expert Patients And

aspects of wearable, smart and/or interactive technologies and game design research.

Advances in Surgery 2020

Advances in Human Factors in Wearable Technologies and Game Design Several internal and external factors have been identified to estimate and control the psychological stress of training in order to optimize training responses and to avoid fatigue, overtraining and other undesirable health effects of an athlete. An increasing number of lightweight sensor-based wearable technologies (“wearables”) have entered the sports technology market. Non-invasive sensor-based wearable technologies could transmit physical, physiological and biological data to computing platform and may provide through human-machine interaction (smart watch, smartphone, tablet) bio-feedback of various parameters for training load management and health. However, in theory, several wearable technologies may assist to control training load but the assessment of accuracy, reliability, validity, usability and practical relevance of new upcoming technologies for the management of training load is paramount for optimal adaptation and health.

Proceedings of the 2nd International Conference on Recent Trends in Machine Learning, IoT, Smart Cities and Applications Written by an international team of authors the Oxford Textbook of Communication in Oncology and Palliative Care integrates clinical wisdom with empirical findings. It draws upon the history of communication science, providing the reader with a comprehensive curriculum for applied communication skills training. An essential resource, the Oxford Textbook of Communication in Oncology and Palliative Care is filled with tips and strategies for

Read Free Pre Training Programme Express 2017 Expert Patients And

effective communication about difficult and challenging communication. In focusing on cancer and the end-of-life, it deals with the existential and spiritual challenges found across all of medicine, providing deep insights into what is at stake and how clinicians might optimally respond. This authoritative and wide-ranging book provides clinicians with state-of-the-art and evidence-based guidelines to achieve effective, patient-centred communication in the clinical settings of oncology and palliative care. Thoroughly revised and updated, this new edition includes sections on the curriculum for nurses, the core curriculum, and an introductory section on communication science. The chapters embrace specialty issues across the clinical disciplines, from enrolling in clinical trials, working in teams, and discussing genetic risk, to talking about sexuality, infertility, and intercultural issues. An educational perspective is also provided, with chapters covering communication skills training, how to evaluate courses, and international models of training.

Recruiting Immigrant Workers: Canada 2019 Canada has not only the largest in terms of numbers, but also the most elaborate and longest-standing skilled labour migration system in the OECD. Largely as a result of many decades of managed labour migration, more than one in five people in Canada is foreign-born, one of the highest shares in the OECD. 60% of Canada's foreign-born population are highly educated, the highest share OECD-wide.

OECD Reviews of Vocational Education and Training Apprenticeship in England, United Kingdom This timely volume opens a window on issues related to English language education in Vietnam. The authors consider that teacher quality is the key factor to be considered if the national English language curriculum outcomes are to be

Read Free Pre Training Programme Express 2017 Expert Patients And

achievable. Aiming to shed light on key issues recently observed in the Vietnamese landscape of English language education, it examines the complexity of the institutionalization of the standardized English proficiency policy, which has been in force since 2008. That policy uses the Common European Framework of References for Languages (CEFR) as the model to set the standards and levels of proficiency for teachers, learners and state employees. The book presents both the theoretical and practical aspects of the standardization movement in English language education. The contents comprise a series of extended research-based chapters written by experts of language-in-education policy and planning in and about Vietnam from a range of perspectives including teachers, English language curriculum developers, teacher educators and researchers. The rich coverage of the book includes current discussion on English language education in Vietnam ranging from policy to practice, making it highly relevant to English teachers, teacher educators, and scholars, in Vietnam and worldwide, who aspire to broaden their horizons and professionalism.

The Bright Side of Shame This book fills a critical gap in a neglected area in current educational research: international teacher education. It focuses on the preparation of teachers of English as an additional language (EAL) in several world regions. The book consists of chapters by researchers in well-established teacher education programs in 11 countries: Brazil, Canada, China, Finland, Greece, New Zealand, Russia, Saudi Arabia, South Korea, Turkey and the United States of America. It takes a cross-national, comparative approach around four major focus areas: policy, research, curriculum and practice, offering critical implications that can help improve EAL teacher education programs in different parts of the world. Teacher education is an area that has great potential for international cross-pollination of ideas and actions, and this book represents an important first step along this

Read Free Pre Training Programme Express 2017 Expert Patients And

road.

Neuropsychological Rehabilitation Written by two highly successful business coaches and management consultants, this book explains how to improve profitability by focusing on turning a business's already satisfied customers into highly satisfied customers by removing their sense of risk. The authors also provide a fail-safe method for identifying the risks inherent in your business. • Provides research-based insights into consumer behavior across a diverse series of businesses, including health care, food service, hotels, pharmaceuticals, and retail • Demonstrates that the idea of there being a linear relationship between customer satisfaction and customer loyalty is a myth • Refutes the oft-heard objection that creating highly satisfied customers is too costly by showing that highly satisfied customers are consistently 2-5 percent cheaper to serve than satisfied ones • Offers business owners and managers a proven methodology for better understanding the key aspects of a company's product and service offerings that create highly satisfied customers • Examines the organizational challenges inherent in deploying a customer loyalty initiative and discusses ways that successful companies have overcome these challenges

Comparative Sociology of Examinations This book constitutes the refereed proceedings of the First MICCAI Workshop on Domain Adaptation and Representation Transfer, DART 2019, and the First International Workshop on Medical Image Learning with Less Labels and Imperfect Data, MIL3ID 2019, held in conjunction with MICCAI 2019, in Shenzhen, China, in October 2019. DART 2019 accepted 12 papers for publication out of 18 submissions. The papers deal with methodological advancements and ideas that can improve the applicability of machine learning and deep learning approaches to

Read Free Pre Training Programme Express 2017 Expert Patients And

clinical settings by making them robust and consistent across different domains. MIL3ID accepted 16 papers out of 43 submissions for publication, dealing with best practices in medical image learning with label scarcity and data imperfection.

Dietary Fructose and Glucose: The Multifaceted Aspects of Their Metabolism and Implication for Human Health (Vol. 2) In recent years, there has been growing interest in understanding how the third generation of cognitive-behavioral approaches, particularly mindfulness-, compassion-, and acceptance-based approaches, can contribute to the design of more efficacious parenting interventions and to a better understanding of parenting behaviors and the parent-child relationship. However, the application of third-generation cognitive-behavioral therapies and concepts to parenting is still in its infancy, and further research is needed to explore the potential of these approaches to enhance existing parenting interventions or to inform the development of new parenting interventions targeting different groups of parents and their children. More research is also needed to understand how mindfulness, (self-)compassion, acceptance and other related psychological processes may influence parenting practices, the parent-child relationship, and the child's socioemotional development. With this e-book, presenting state-of-the-art research articles on third generation cognitive-behavioral approaches, a new step is taken in 1) exploring relations between parenting-related issues and concepts from the third generation cognitive-behavioral framework, and 2) examining parenting-interventions informed by third-generation cognitive-behavioral therapies.

Good Practice for Good Jobs in Early Childhood Education and Care A comprehensive review of the techniques and applications of descriptive analysis Sensory evaluation

Read Free Pre Training Programme Express 2017 Expert Patients And

is a scientific discipline used to evoke, measure, analyse and interpret responses to products perceived through the senses of sight, smell, touch, taste and hearing. It is used to reveal insights into the ways in which sensory properties drive consumer acceptance and behaviour, and to design products that best deliver what the consumer wants. Descriptive analysis is one of the most sophisticated, flexible and widely used tools in the field of sensory analysis. It enables objective description of the nature and magnitude of sensory characteristics for use in consumer-driven product design, manufacture and communication. Descriptive Analysis in Sensory Evaluation provides a comprehensive overview of a wide range of traditional and recently-developed descriptive techniques, including history, theory, practical considerations, statistical analysis, applications, case studies and future directions. This important reference, written by academic and industrial sensory scientist, traces the evolution of descriptive analysis, and addresses general considerations, including panel set-up, training, monitoring and performance; psychological factors relevant to assessment; and statistical analysis. Descriptive Analysis in Sensory Evaluation is a valuable resource for sensory professionals working in academia and industry, including sensory scientists, practitioners, trainers and students, and industry-based researchers in quality assurance, research and development, and marketing.

Deep Generative Models, and Data Augmentation, Labelling, and Imperfections This book is a printed edition of the Special Issue "Dietary Fructose and Glucose: The Multifaceted Aspects of their Metabolism and Implication for Human Health" that was published in Nutrients

Reducing Anxiety of Persons Practicing Pastoral Care The book Mastering anti-

Read Free Pre Training Programme Express 2017 Expert Patients And

corruption – The practitioners' view is aimed at presenting different ways and modes of mastering anti-corruption in selected countries. By showing examples and cases the authors of particular chapters would like to emphasize the necessity of implementing solutions that will help to prevent corruption at all or at least will diminish its negative effects on business and human beings. The book is divided into four parts: “Introduction”, “Anti-Corruption as a Topic in Practice – national and international perspective”, “Anti-Corruption as a Topic in Practice – organizational perspective” and “Anti-Corruption as a Topic in Practice – ethical perspective”. Authors of this book presented a wide range of issues and topics covering the problem of preventing and fighting the corruption around the world. Hopefully the cases will constitute a good practice for countries and nations facing the problem of corruption and will be an inspiration for further research as well as practical applications in this area.

Oxford Textbook of Communication in Oncology and Palliative Care This book constitutes the refereed proceedings of the First MICCAI Workshop on Deep Generative Models, DG4MICCAI 2021, and the First MICCAI Workshop on Data Augmentation, Labelling, and Imperfections, DALI 2021, held in conjunction with MICCAI 2021, in October 2021. The workshops were planned to take place in Strasbourg, France, but were held virtually due to the COVID-19 pandemic. DG4MICCAI 2021 accepted 12 papers from the 17 submissions received. The workshop focusses on recent algorithmic developments, new results, and promising future directions in Deep Generative Models. Deep generative models such as Generative Adversarial Network (GAN) and Variational Auto-Encoder (VAE) are currently receiving widespread attention from not only the computer vision and machine learning communities, but also in the MIC and CAI community. For DALI 2021, 15 papers from 32 submissions were accepted for

Read Free Pre Training Programme Express 2017 Expert Patients And

publication. They focus on rigorous study of medical data related to machine learning systems.

Web Information Systems Engineering - WISE 2021 This collection brings together theory and ethnographic research from a range of national contexts to offer unique insights into the nature of agency in language policy and planning. Situated within a broader sociological framework, the book explores agentive processes at work in case studies from around the world, engaging in discussions of such key themes as language and identity, language ideologies, linguistic diversity in education, and language revitalization. Each chapter examines the ways in which decisions made at both the local and national level impact language use and in turn, the dynamic relationship between language use, policy, and practice in these contexts. Taken together, this volume advances our understanding of agency in language policy and planning and directions for future research, making this key reading for students and scholars in language and education, critical sociolinguistics, and applied linguistics.
