This book explores how history teaching can support conflict reduction in deeply divided societies. Using Northern Ireland as its case study, the work contributes to how people think about the identity-based conflict that surrounds them and involves them. It also acts as a manual for those who wish to undertake projects to change attitudes about history in post-conflict societies.

Network and system administration usually refers to the skill of keeping computers and networks running properly. But in truth, the skill needed is that of managing complexity. This book describes the science behind these complex systems, independent of the actual operating systems they work on. It provides a theoretical approach to systems administration that: saves time in performing common system administration tasks. allows safe utilization of untrained and trained

help in maintaining mission-critical systems. allows efficient and safe centralized network administration. Managing Human-Computer Networks: Will show how to make informed analyses and decisions about systems, how to diagnose faults and weaknesses Gives advice/guidance as to how to determine optimal policies for system management Includes exercises that illustrate the key points of the book The book provides a unique approach to an old problem and will become a classic for researchers and graduate students in Networking and Computer Science, as well as practicing system managers and system administrators.

A Miracle Life is a MUST read book for every woman, parent, teacher, counselor and the general public. It is a book that will touch everyone that reads it. The book tells of the dilemma of a woman who

had to suffer the agonizing problems of a child who could not understand why he was different from other children who could easily read and write. It tells of the problem a grandmother had of bringing up a child, born prematurely and who turned out to be dyslexic. The book tells of a society which knew nothing of dyslexia and thought the child was abnormally dull and could not be helped. The woman struggled and managed to get her child through to High School. The child himself suffered ridicule from his peers and extreme embarrassment from society which did not understand him and which rejected him at times. In the end Tiza becomes lonely and withdrawn. He starts fearing to go to school because his class mates laughed at him when he failed to read and write properly. The trauma of it all is agonizing. Theresa Nyirenda has resolved that no other woman should suffer the way she and her grandchild suffered because of lack of knowledge on Dyslexia. Through this book, she has taken a stand to sensitize the public and lobby everybody concerned that Dyslexia is real and dyslexics should be helped because these people have special gifts and if well trained, they could become responsible citizens in the country and the world.

Education is the heart of a successful nation. A learning nation is a successful nation. The nation that fails to educate its citizens faces numerous challenges such as social problems, financial problems, and rebellion. But for the success of education there should be enough and good teachers to teach students. In many countries, the number of good teachers is diminishing as the teaching career is becoming less attractive to a number of students because of the problems that are associated to teaching. It is imperative for the governments to come up with measures to increase the number of teachers in schools. It is unchallenged that teachers are one of the vital elements of education system. Therefore they need to be motivated and retained. Furthermore, the education system can be effective if the students are prepared to learn. It is very difficult for the teachers to impart knowledge to students that have barriers of education such as poor behavior. Therefore, parents have an important role to play to ensure that students come to school prepared to learn and without any barriers to education. It is the responsibility of the government and organizations to retain and motivate teachers. Systems of education will be successful if they are supported by the government, organizations, communities, parents, learners, and teachers. There should be good structures in the education system to produce more teachers who will be responsible in

educating the nation. The death of a good system of education would drive the nation back to a time of ignorance where uneducated people will become leaders of nations.
