### The Cambridge Handbook of Social Problems:

This book is a printed edition of the Special Issue Addressing Food and Nutrition Security in Developed Countries that was published in IJERPH

### A Research Agenda for Territory and Territoriality

In the world's most affluent and food secure societies, why is it now publicly acceptable to feed donated surplus food, dependent on corporate food waste, to millions of hungry people? While recognizing the moral imperative to feed hungry people, this book challenges the effectiveness, sustainability and moral legitimacy of globally entrenched corporate food banking as the primary response to rich world food poverty. It investigates the prevalence and causes of domestic hunger and food waste in OECD member states, the origins and thirty-year rise of US style charitable food banking, and its institutionalization and corporatization. It unmasks the hidden functions of transnational corporate food banking which construct domestic hunger as a matter for charity thereby allowing indifferent and austerity-minded governments to ignore increasing poverty and food insecurity and their moral, legal and political obligations, under international law, to realize the right to food. The book's unifying theme is understanding the food bank nation as a powerful metaphor for the deep hole at the centre of neoliberalism, illustrating: the de-politicization of hunger; the abandonment of social rights; the stigma of begging and loss of human dignity; broken social safety nets; the dysfunctional food system; the shift from income security to charitable food relief; and public policy neglect. It exposes the hazards of corporate food philanthropy and the moral vacuum within negligent governments and their lack of public accountability. The advocacy of civil society with a right to food bite is urgently needed to gather political will and advance 'joined-up' policies and courses of action to ensure food security for all.

### Regional Overview of Food Security in Latin America and the Caribbean

Equality, Inequalities and Diversity offers an authoritative critical analysis of equality, inequality and diversity in organizations. Using international examples it explores contemporary concepts and debates based on original research in a number of fields and sectors, an ideal course companion for anyone studying diversity.

### Equality, Inequalities and Diversity

In Beyond Parliament, Horman Chitonge, draws from diverse experiences around the rights to water and food in the global South, to illustrate that giving effect to these rights require going beyond parliamentary politics to the radical politics of social change.

### Insights and Commentaries: South and Central Asia

This volume studies the relation between globalization and inequalities in emerging societies by linking Area and Global Studies, aiming at a new theory of inequality beyond the nation state and beyond Eurocentrism.

### 2017 global hunger index: The inequalities of hunger

# Download Ebook Seeking Food Rights Nation Inequality And Repression In Uzbekistan Case Studies On Contemporary Social Issues

This book focuses on descriptions of the developments in legal frameworks and policies regarding the human rights of older persons. First, it covers the policies adopted and practices developed at the universal system, particularly within the sphere of the United Nations. Second, it includes a side-by-side comparison of the work of regional human rights mechanisms, which have picked up some momentum in the past decade. Through its inclusion of law, policy, and current processes, the widest net possible has been cast to collect a descriptive resource for advocates. Overall, we hope that this book contributes to a better understanding of the current limitations and possibilities that international institutions offer to uphold the human rights of older persons. We expect that this information will allow states and other policy makers to move forward with the international recognition of the human rights of older persons. We know this is only a first effort in compiling and reporting the standards that are being produced by different international institutions. But we have no doubt that many others will follow with their expert analysis of these emerging standards, and that the ongoing discussion will finally crystalize in international human rights binding instruments explicitly recognizing the universal rights of older persons.

## Cultural Anthropology

International Encyclopedia of Human Geography, Second Edition embraces diversity by design and captures the ways in which humans share places and view differences based on gender, race, nationality, location and other factors—in other words, the things that make people and places different. Questions of, for example, politics, economics, race relations and migration are introduced and discussed through a geographical lens. This updated edition will assist readers in their research by providing factual information, historical perspectives, theoretical approaches, reviews of literature, and provocative topical discussions that will stimulate creative thinking. Presents the most up-to-date and comprehensive coverage on the topic of human geography Contains extensive scope and depth of coverage Emphasizes how geographers interact with, understand and contribute to problem-solving in the contemporary world Places an emphasis on how geography is relevant in a social and interdisciplinary context

## Research Handbook on Human Rights and Business

Explore cultural anthropology and its relevance in today's world with Gary Ferraro and Susan Andreatta's CULTURAL ANTHROPOLOGY: AN APPLIED PERSPECTIVE, Tenth Edition. This contemporary book provides interesting real-world examples and applications of the principles and practices of anthropology, helping readers appreciate other cultures as well as their own--and apply what they learn to situations in their personal and professional life. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

## Addressing Food and Nutrition Security in Developed Countries

## Cultural Anthropology: An Applied Perspective

This volume emerged out of a search for scholarship that has studied connectivity between South and Central Asia from a variety of perspectives. Geographically and culturally, the vision that India has had of the region she referred to as Central Asia is of a space extending across China westward upto the Aral Sea and including within it Balkh, Bukhara and Samarkand. The Indian fascination with the region extends to various levels as this is the region out of which invading tribes entered India, across whose Silk Routes trade flourished and also the region where Indian culture and religion spread. Keeping this in mind the volume begins with an overview of positions from which the region has been traditionally situated from the Indian perspective as also reflections on the current scenario in terms of the geopolitical transformations of recent times. It then moves on to examine the history of the political, cultural and economic connections between the two regions from comparative perspectives. Written by specialists from Uzbekistan the articles reflect on connections that had ancient roots and shared historical experiences. The first set of articles focus on the historical linkages between the two regions. Another set looks at similar developments in the region in terms of transformations in the socio-political life of the people as also in the economy. Encounters and the necessity of security cooperation between the two regions is the focus of a third set of articles. The second part of the volume looks into certain issues that are significant in both South and Central Asia. Written with Uzbek insight they reflect on Soviet and post-Soviet state policies on a range of issues from gender and maternity policies, ethnic policies and social stratification, information policy and policies related to global organizations that have comparable relevance in the Indian context.

## International Encyclopedia of Human Geography

Written by the experienced author team of Susan Andreatta and Gary Ferraro, ELEMENTS OF CULTURE: AN APPLIED PERSPECTIVE is a concise new text for the cultural anthropology course. It covers all the major topics you expect in a traditional course in twelve brief chapters that allow your students to access the main concepts quickly. The book's streamlined content, pedagogy, and real-world applications focus students on global current events and issues that illustrate the usefulness of anthropology in careers and in solving societal problems. The brief format allows you the flexibility to assign additional readings, including ethnographic case studies or selections from CourseReader's online Editor's Choice list of original applied anthropology articles. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

## Routledge International Handbook of Migration Studies

From Human to Post Human Security in Latin America provides a fresh look to some acute problems regarding human security in Latin America: human rights and dignity, water, food and health insecurities. This is essential reading for professionals, practitioners, and those interested in human security in Latin America.

## Freedom from poverty as a human right: economic perspectives

The introduction of the Affordable Care Act in the United States, the increasing use of prescription drugs, and the alleged abuse of racial profiling by police are just some of the factors contributing to twenty-first-century social problems. The Cambridge Handbook of Social Problems offers a wide-ranging roster of the social problems currently pressing for attention and amelioration. Unlike other works in this area, it also gives great consideration to theoretical and methodological discussions. This Handbook will benefit both undergraduate and graduate students eager to understand the sociology of social problems. It is suitable for classes in social problems, current events, and social theory. Featuring the most current research, the Handbook provides an especially useful resource for sociologists and graduate students conducting research.

## The Century of Women

Latin America and the Caribbean managed to reduce the number of undernourished by 20 million compared to the year 2000. However, 2018 marks the fourth consecutive year in which hunger shows a continuous increase. Moderate or severe food insecurity in Latin America increased considerably. This increase caused more than 32 million people to join the almost 155 million who lived in food insecurity in the Region in 2014-2016. The Region has shown significant progress in reducing child malnutrition and it is significantly distant and below the global prevalence of malnutrition in girls and boys. However, malnutrition due to excessive weight in the Region is one of the highest in the world and it continues to increase. This year, the Regional Overview of Food Security and Nutrition in Latin America and the Caribbean focuses on food environments and describes some of the main policies that the countries of Latin America and the Caribbean are developing to face the different forms of malnutrition.

## Political Power and Economic Inequality

In the United States, the causes and even the meanings of poverty are disconnected from the causes and meanings of global poverty. The Routledge Handbook of Poverty in the United States provides an authoritative overview of the relationship of poverty with the rise of neoliberal capitalism in the context of globalization. Reorienting its national economy towards a global logic, US domestic policies have promoted a market-based strategy of economic development and growth as the obvious solution to alleviating poverty, affecting approaches to the problem discursively, politically, economically, culturally and experientially. However, the handbook explores how rather than alleviating poverty, it has instead exacerbated poverty and pre-existing inequalities – privatizing the services of social welfare and educational institutions, transforming the state from a benevolent to a punitive state, and criminalizing poor women, racial and ethnic minorities, and immigrants. Key issues examined by the international selection of leading scholars in this volume include: income distribution, employment, health, hunger, housing and urbanization. With parts focusing on the lived experience of the poor, social justice and human rights frameworks – as opposed to welfare rights models – and

# Download Ebook Seeking Food Rights Nation Inequality And Repression In Uzbekistan Case Studies On Contemporary Social Issues

the role of helping professions such as social work, health and education, this comprehensive handbook is a vital reference for anyone working with those in poverty, whether directly or at a macro level.

## Beyond Parliament

This balanced study offers an essential comparative analysis of worldwide income inequality. Charles F. Andrain argues that the globalization of income inequality explains contemporary political life in the United States as well as in other parts of the world. To fully understand global income distribution, we need to grasp how historical changes affect these trends, why social movements stage protests against the growing income gap, and how a comparative approach best explains income differences. Andrain's tightly written interdisciplinary study stresses the impact of this problem on political life and social change in the United States, Europe, Asia, and Latin America. The comparative evidence probes the full dynamics of this controversial issue and its consequences for society as a whole.

## Fast Track, NAFTA, MERCOSUR, and Beyond

## Human Rights and the Reinvention of Freedom

This book examines ways in which cancer health disparities exist due to class and context inequalities. The volume demonstrates that poverty is a health issue because it erodes the social, political, and economic support systems that enhance well-being and healthy lifestyles necessary for human development and human betterment.

## Tax, Inequality, and Human Rights

Food is a challenging subject. There is little consensus about how and what we should produce and consume. It is not even clear what food is or whether people have similar experiences of it. On one hand, food is recognized as a basic need, if not a basic right. On the other hand, it is hard to generalize about it given the wide range of practices and cuisines, and the even wider range of tastes. This book is an introduction to the philosophical dimensions of food. David M. Kaplan examines the nature and meaning of food, how we experience it, the social role it plays, its moral and political dimensions, and how we judge it to be delicious or awful. He shows how the different branches of philosophy contribute to a broader understanding of food: what food is (metaphysics), how we experience food (epistemology), what taste in food is (aesthetics), how we should make and eat food (ethics), how governments should regulate food (political philosophy), and why food matters to us (existentialism). Kaplan embarks on a series of philosophical investigations, considering topics such as culinary identity and authenticity, tasting and food criticism, appetite and disgust, meat eating and techno-foods, and consumerism and conformity. He emphasizes how different narratives help us navigate the complex world of food and reminds us we all have responsibilities to ourselves, to others, and to animals. An original treatment of a timely subject, Food Philosophy is suitable for undergraduates while making a significant contribution to scholarly debates.

## Seeking Food Rights + National Geographic Learning Reader Cultural Anthropology + Bind-in Ebook

This timely collection of 15 original essays written by expert scientists the world over addresses the relationships between human population growth, the need to increase food supplies to feed the world population, and the chances for avoiding the extinction of a major proportion of the world's plant and animal species that collectively makes our survival on Earth possible. These relationships are highly intertwined, and changes in each of them steadily decrease humankind's chances to achieve environmental stability on our fragile planet. The world population is projected to be nine to ten billion by 2050, signaling the need to increase world food production by more than 70 percent on the same amount of land currently under production—and this without further damaging our fragile environment. The essays in this collection, written by experts for laypersons, present the problems we face with clarity and assess our prospects for solving them, calling for action but holding out viable solutions.

## Water Diplomacy in Action

Rosenberger's case study focuses on food systems to Central Asia and Uzbekistan, ultimately awakening readers to the fact that how we share food in our households, communities, nations, and the world fundamentally shapes and reshapes the contours of the globe for its lands and its peoples. Rosenberger describes her aims as multifold: to introduce readers to Uzbekistan, a country in a region where political and economic currents challenge us to reach a better understanding; to give readers practice in thinking intensively through the meaning of food rights in a certain time and place; and, to use food systems as a means of alerting readers to channels for considering power differences (whether based on class, ethnic, gender, or politics) that exist within a nation. Upon completion of the book, readers will be stimulated to think more deeply about our food systems on local and global levels. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

## Need for Renewal of Fast-track Trade Negotiating Authority

In *Dilemmas of Adulthood*, Nancy Rosenberger investigates the nature of long-term resistance in a longitudinal study of more than fifty Japanese women over two decades. Between 25 and 35 years of age when first interviewed in 1993, the women represent a generation straddling the stable roles of post-war modernity and the risky but exciting possibilities of late modernity. By exploring the challenges they pose to cultural codes, Rosenberger builds a conceptual framework of long-term resistance that undergirds the struggles and successes of modern Japanese women. Her findings resonate with broader anthropological questions about how change happens in our global-local era and suggests a useful model with which to analyze ordinary lives in the late modern world. Rosenberger's analysis establishes long-term resistance as a vital type of social change in late modernity where the sway of media, global ideas, and friends vies strongly with the influence of family, school, and work. Women are at the nexus of these contradictions, dissatisfied with post-war normative roles in family, work, and leisure and yet—in Japan as elsewhere—committed to a search for self that shifts uneasily between self-actualization and selfishness. The women's rich narratives and conversations recount their ambivalent defiance of social norms and attempts to live diverse lives as acceptable adults. In an epilogue, their experiences are framed by the aftermath of the 2011 earthquake and tsunami, which is already shaping the future of their long-term resistance. Drawing on such theorists as Ortner, Ueno, the Comaroffs, Melucci, and Bourdieu, Rosenberger posits that long-term resistance is a process of tense, irregular, but insistent change that is characteristic of our era, hammered out in the in-between of local and global, past and future, the old virtues of womanhood and the new virtues of self-actualization. Her book is essential for anyone wishing to understand how Japanese women have maneuvered their lives in the economic decline and pushed for individuation in the 1990s and 2000s.

## Food Bank Nations

## From Human to Post Human Security in Latin America

This authoritative Research Handbook brings together leading international scholars and practitioners to provide in-depth analysis of some of the most hotly debated topics and issues concerning the interface of human rights and business. Offering critical insights on prominent strands of research within the field of business and human rights, this comprehensive Research Handbook examines key challenges and potential solutions in the field.

## The Routledge Handbook of Poverty in the United States

This revised and expanded second edition of *Routledge International Handbook of Migration Studies* provides a comprehensive basis for understanding the complexity and patterns of international migration. Despite increased efforts to limit its size and consequences, migration has wide-ranging impacts upon social, environmental, economic, political, and cultural life in countries of origin and settlement. Such transformations impact not only those who are migrating, but those who are left behind, as well as those who live in the areas where migrants settle. Featuring forty-six essays written by leading international and multidisciplinary scholars, this new edition showcases evolving research and theorizing around refugees and forced migrants, new migration paths through Central Asia and the Middle East, the condition of statelessness, and South to South migration. New chapters also address immigrant labor and entrepreneurship, skilled migration, ethnic succession, contract labor and informal economies. Uniquely among texts in the subject area, the Handbook provides a six-chapter compendium of methodologies for studying international migration and its impacts. Written in a clear and direct style, this Handbook offers a contemporary integrated resource for students and scholars from the perspectives of social science, humanities, journalism and other disciplines.

## Human Rights

## Controversies in Latin American Bioethics

In an era of globalization and greater connectivity, human rights have come to the fore. Human rights depend on treaties but also increasingly on local and national laws and grassroots activism. The authors provide a basic introduction to human rights, and they unveil long-standing yet intensifying obstacles to attaining them—most notably the opposing logics of capitalism and of solidarity and collective struggles. They suggest ways to overcome these contradictions and create greater participation by the U.S. in the international community.

## Seeking Food Rights: Nation, Inequality and Repression in Uzbekistan

This volume seeks to propose a reinvention of freedom under contemporary conditions of globalization, cross-border mobility, and neo-liberal dominance. There are currently two predominant myths circulating about freedom. The first is that in a global age growing numbers of citizens are less concerned with freedom than they are with security. Secondly, there is the presumption that freedom only refers to market freedom and consumerism, implying that the ideas of choice and consumption are interchangeable with ideas of freedom. Stevenson

# Download Ebook Seeking Food Rights Nation Inequality And Repression In Uzbekistan Case Studies On Contemporary Social Issues

argues that while these arguments are significant, they are deeply misleading. More 'authentic' ideas of freedom such as self-realisation, participating in politics and seeking a meaningful life of self-reflection have not been entirely displaced but have instead become reinvented in our global times. The cries of freedom can still be heard in a multitude of places from the Arab Spring to the Occupy Movement and from the protests against European austerity to the current popularity of human rights. Stevenson also argues that the idea of freedom has become increasingly mobile in our interconnected and transnational society. The spaces and places of civil society are more complex in this global age, pushing ideas of freedom far beyond the usual arena of national politics. This volume brings together a diverse range of cultural interpretations in respect of freedom related to the idea of the commons, cosmopolitanism, contemporary documentary cinema and the history of jazz music. Exploring the ways in which notions of freedom are being re-made within the context of the present, and looking more precisely at the current threats to freedom, it will be of interest to students and scholars of globalization, human rights and cultural sociology.

## Sustaining Social Inclusion

Complex water problems cannot be resolved by numbers or narratives. Contingent and negotiated approaches are necessary for actionable outcome. In the face of a constantly changing array of interconnected water issues that cross multiple boundaries, the challenge is how to translate solutions that emerge from science and technology into the context of real-world policy and politics. Water Diplomacy in Action addresses this task by synthesizing two emerging ideas—complexity science and negotiation theory—to understand and manage risks and opportunities for an uncertain water future. Rooted in the ideas of complexity science and mutual gains negotiation, this edited volume shows why traditional systems engineering approaches may not work for complex problems, what emerging tools and techniques are needed and how these are used to resolve complex water problems.

## Human Rights of Older People

The right to food is guaranteed in South Africa's Constitution as it is in international law. Yet food insecurity remains widespread and persistent, at levels much higher than in countries with similar levels of per capita GDP and development, such as Brazil. In this book, leading local and international researchers on food security and related policy work have come together to create the first systematic and trans-disciplinary analysis of food security and its multiple dimensions in South Africa and the southern African region. Drawing on Amartya Sen's entitlement theory to identify the key drivers of hunger, they see food insecurity as a chronic, structurally based condition rather than only resulting from natural environmental disasters, temporary economic shocks and household vulnerabilities. The authors focus on a range of policy options and choices to provide short-term and longer-term solutions to the systemic causes of unemployment, failing rural livelihoods and traditional subsistence production. They also emphasise the linkages between the social and economic dimensions of food insecurity and use an integrative, interdisciplinary approach to analyse the reasons why these conditions persist and what can be done to address them. Importantly the book brings together work undertaken at local and national levels in new ways so that policy-makers, researchers, human rights advocates and social and economic scholars are better able to make the links between macro- and micro-processes of development.

## Globalization and Inequality in Emerging Societies

This innovative Research Agenda draws together discussions on the conceptualization of territory and the ways in which territory and territorial practices are intimately bound with issues of power and control. Expert contributors provide a critical assessment of key areas of scholarship on territory and territoriality across a wide range of spatial scales and with examples drawn from the global landscape.

## Food Philosophy

Crossroads of Cuisine offers history of food and cultural exchanges in and around Central Asia. It discusses geographical base, and offers historical and cultural overview. A photo essay binds it all together. The book offers new views of the past.

## Crossroads of Cuisine

This book deals with the complex and challenging relationship between economic policy and human rights. In the context of the COVID-19 pandemic crisis, the need to address the conceptual and methodological (dis)connects between these two areas is more pressing than ever. Inspired by the 2019 United Nations Guiding Principles on Human Rights Impact Assessments (HRIA) for Economic Reform Policies, this book brings together experts working on human rights and economic policy from a range of disciplinary perspectives, including economics, law, and development studies. The contributions reflect a huge body of professional experience in the academic, policy-making, advocacy, and practitioner fields. They cover issues including the politics of evidence in the context of HRIA, economic inequality, child rights impact assessment of economic reforms, economic policy and women's human rights, tax regimes for multinational corporations and human rights, as well as the human rights impacts of the economic fall-out of the COVID-19 pandemic. The collection also includes the text of the Guiding Principles themselves. It constitutes a crucial volume for scholars, policymakers, advocates and others working on the burning topic of human rights and economic policy reform. The chapters in this book were originally published as a special issue of The International Journal of Human Rights.

# Download Ebook Seeking Food Rights Nation Inequality And Repression In Uzbekistan Case Studies On Contemporary Social Issues

## Human Rights and Economic Policy Reform

For the first time, *Human Rights and Tax in an Unequal World* brings together works by human rights and tax law experts, to illustrate the linkages between the two fields and to reveal their mutual relevance in tackling economic, social, and political inequalities. Against the backdrop of systemic corporate tax avoidance, the widespread use of tax havens, persistent pressures to embrace austerity policies, and growing gaps between the rich and poor, this book encourages readers to understand fiscal policy as human rights policy, with profound consequences for the wellbeing of citizens around the world. The essays collected examine where the foundational principles of tax law and human rights law intersect and diverge; discuss the cross-border nature and human rights impacts of abusive practices like tax avoidance and evasion; question the role of states in bringing transparency and accountability to tax policies and practices; highlight the responsibility of private sector actors for the consequences of tax laws; and critically evaluate certain domestic tax rules through the lens of equality and non-discrimination. The contributing scholars and practitioners explore how an international human rights framework can anchor debates around international tax reform and domestic fiscal consolidation in existing state obligations. They address what human rights law requires of state tax policies, and what a state's tax laws and loopholes mean for the enjoyment of human rights within and outside its borders. Ultimately, tax and human rights both turn on the relationship between the individual and the state, and thus both fields face crises as the social contract frays and populist, illiberal regimes are on the rise.

## Food Security in South Africa

## Population, Agriculture, and Biodiversity

*Sustaining Social Inclusion* is the third book in a series on social exclusion and social inclusion. It explores what different understandings of sustainability mean in respect of social inclusion in the variety of fields that deal with human health and well-being. The book is global in its scope, with chapters relating to socially inclusive health and social welfare practice internationally. This book is divided into seven parts: Introduction; Sustainable policies for promoting social inclusion; Sustaining programmes which support social inclusion; Sustaining organisations which promote social inclusion; Sustainable social inclusion outcomes; Sustainable social development; and Conclusions. It examines how social inclusion can be sustained in the long-term when funding tends to be time-limited. This research-based book is relevant to a wide range of different readerships globally. It addresses issues of concern for those engaged in debates about the provision of health, social welfare, and other public services. *Sustaining Social Inclusion* will be of interest to academics, policy makers, and practitioners in a wide range of fields, including public health, health promotion, health sciences, history, medicine, philosophy, disability studies, social work, social policy, sociology, and urban planning.

## Congressional Record

The 2017 Global Hunger Index (GHI) shows long-term progress in reducing hunger in the world. The advances have been uneven, however, with millions of people still experiencing chronic hunger and many places suffering acute food crises and even famine. According to 2017 GHI scores, the level of hunger in the world has decreased by 27 percent from the 2000 level. Of the 119 countries assessed in this year's report, one falls in the extremely alarming range on the GHI Severity Scale; 7 fall in the alarming range; 44 in the serious range; and 24 in the moderate range. Only 43 countries have scores in the low range. In addition, 9 of the 13 countries that lack sufficient data for calculating 2017 GHI scores still raise significant concern, including Somalia, South Sudan, and Syria. To capture the multidimensional nature of hunger, GHI scores are based on four component indicators—undernourishment, child wasting, child stunting, and child mortality. The 27 percent improvement noted above reflects progress in each of these indicators according to the latest data from 2012–2016 for countries in the GHI.

## Dilemmas of Adulthood

This book offers a first rate selection of academic articles on Latin American bioethics. It covers different issues, such as vulnerability, abortion, biomedical research with human subjects, environmental, exploitation, commodification, reproductive medicine, among others. Latin American bioethics has been, to an important extent, parochial and unable to meet stringent international standards of rational philosophical discussion. The new generations of bioethicists are changing this situation, and this book demonstrates that change. All articles are written from the perspective of Latin American scholars from several disciplines such as philosophy and law. Working with the tools of analytical philosophy and jurisprudence, this book defends views with rational argument, and opening for pluralistic discussion.
