Distributors of Marine & Industrial Equipment We supply all sectors of the marine industry, from marine valets to the biggest boat builders Our product range also lends itself to applications outside the marine industry, these applications include specialist vehicle builders, coach builders, mobile electricity requirements, plumbers and general industrial applications.

To reduce the impact of biofouling, antifouling coatings have been developed and applied to marine vessels since ancient times. Traditional antifouling coatings consist of chemically active compounds, such as silver , copper and tributyltin (TBT) .These coatings lack specificity, exhibit high toxicity to
